this volume brings together a selection of papers written by patricia werhane during the most recent quarter century the book critically explicates the direction and

development of werhane s thinking based on her erudite and eclectic sampling of orthodox philosophical theories it starts out with an introductory chapter setting werhane s work in the context of the development of business ethics theory and practice along with an illustrative time line next it discusses possible interpretations of the papers that have been divided across a range of themes and examines werhane s contribution to these thematic areas patricia h werhane is a renowned author and innovator at the intersection of philosophy and applied business ethics she is professor emerita and a senior fellow at the olsson centre for applied ethics at darden and was formerly the ruffin professor of business ethics she is also professor emerita at depaul university where she was wicklander chair in business ethics and director of the institute for business and professional ethics a prolific author whose works include moral imagination and management decision making and organization ethics for health care werhane is an acclaimed authority on employee rights in the workplace one of the leading scholars on adam smith and founder and former editor in chief of business ethics quarterly the leading journal of business ethics she was a founding member and past president of the society for business ethics and in 2001 was elected to the executive committee of the association for practical and professional ethics before joining the darden faculty in 1993 werhane served on the faculty of loyola university chicago and was a rockefeller fellow at dartmouth college and senior fellow at cambridge university

what role can resources that go beyond text play in the development of moral education in law schools and law firms how can these resources especially those from the visual and performing arts nourish the imagination needed to confront the ethical complexities of particular situations this book asks and answers these questions thereby introducing radically new resources for law schools and law firms committed to fighting against the moral complacency that can all too often creep into the life of the law the chapters in this volume build on the companion volume the arts and the legal academy also published by ashgate which focuses on the role of non textual resources in legal education generally concentrating in particular on the moral dimension of legal education the contributors to this volume include a wide range of theorists and leading legal educators from the uk and the us

will imagination and reason sets forth a new understanding of reality and knowledge with far reaching implications for the study of man and society employing a systematic approach claes ryn goes to the philosophical depths to rethink and reconstitute the epistemology of the humanities and social sciences he shows that will and imagination together constitute our basic outlook on life and that reason derives its material and general orientation from the interaction between them the

imaginative master minds novelists poets composers painters and others powerfully affect the sensibility and direction of society sometimes a distorting self serving willfulness at the base of their visions draws civilization including reason into dangerous illusion more penetrating and balanced vision and rationality spring from a different quality of will ryan explains the kind of interplay between will imagination and reason that is conducive to a deepened sense of reality and to intellectual understanding he argues that human life and self knowledge are inescapably historical in developing his dialectical view of intellect he draws from irving babbitt benedetto croce and other philosophers to refute positivistic formalistic and ahistorical theories of knowledge and to develop his alternative advancing a systematic epistemological argument ryan throws much new light on the nature of reason but also on central issues of ethics and aesthetics this trenchant and original work is indispensable to philosophers social political and cultural theorists literary scholars and historians

as the prototypical exemplar of modern visual technology photography was once viewed as a way to enable vision to bypass imagination producing more reliable representations of reality but as an achievement of technological modernity photography can also be seen as a way to realize a creation of the imagination more vividly than can painting or drawing photography and imagination investigates from diverse points of view focusing on both theory and practice the relation between these two terms the book explores their effect on photography s capacity through various forms and modalities of imaginative investments and displacements to affect even reality itself

this volume explores in detail kierkegaard s various relations to his german contemporaries kierkegaard read german fluently and made extensive use of the writings of german speaking authors apart from his contemporary danish sources the german sources were probably the most important in the development of his thought generally this volume represents source work research dedicated to tracing kierkegaard s readings and use of the various german speaking authors in the different fields in a way that is as clearly documented as possible the volume has been divided into three tomes reflecting kierkegaard s main areas of interest with regard to the german speaking sources namely philosophy theology and a more loosely conceived category which has here been designated literature and aesthetics this first tome treats the german philosophical influences on kierkegaard the dependence of danish philosophy on german philosophy is beyond question in a book review in his hegelian journal perseus the poet playwright and critic johan ludvig heiberg laments the sad state of philosophy in denmark while lauding german

speculative philosophy moreover kierkegaard s lifelong enemy the theologian hans lassen martensen claims without exaggeration that the danish systems of philosophy can be regarded as the disjecta membra of earlier german systems all of the major german idealist philosophers made an impact in denmark kant fichte schelling and most significantly hegel kierkegaard was widely read in the german philosophical literature which he made use of in countless ways throughout his authorship

immanuel kant s transcendental deduction of the categories addresses issues centrally debated today in philosophy and in cognitive sciences especially in epistemology and in theory of perception kant s insights into these issues are clouded by pervasive misunderstandings of kant s deduction and its actual aims scope and argument the present edition with its fresh and accurate translation and concise commentary aims to serve these contemporary debates as well as continuing intensive and extensive scholarship on kant s critique of pure reason two surprising results are that transcendental deduction is valid and sound and it holds independently of kant s transcendental idealism this lucid volume is interesting and useful to students yet sufficiently detailed to be informative to specialists

the proceedings present the contributions to the 13th international kant congress which was held at the university of oslo august 6 9 2019 the congress which hosted speakers from more than thirty countries and five continents was dedicated to the topic of the court of reason the idea that reason stands before itself as a tribunal characterizes the whole of kant s critical project without such a court reason falls into conflict with itself with such a court in place however it may succeed in establishing the possibility and limits of metaphysics ethics aesthetics law and science the idea of reason being its own judge is not only pivotal to a proper understanding of kant s philosophy but can also shed light on the burgeoning fields of meta philosophy and philosophical methodology the 2019 kant congress put special emphasis on kant s methodology his account of conceptual critique and the relevance of his ideas to current issues in especially political philosophy and the philosophy of law additional sections discussed a wide range of topics in kant s philosophy the proceedings will provide anyone who is interested in exploring the variety of present day work on kant and kantian themes with a wealth of fruitful inspiration

art and belief presents twelve new essays at the intersection of philosophy of mind and philosophy of art particularly to do with the relation between belief and truth in our experience of art several contributors discuss the cognitive contributions artworks can make and the questions surrounding these can authors of fiction testify to their readers if they can are they culpable for the false beliefs of their readers

formed in response to their work if they cannot that is if the testimonial powers of authors of fiction are limited is there some non testimonial epistemic role that fiction can play and in any case is such a role relevant when determining the value of the work also explored are issues concerned with the phenomenon of fictional persuasion specifically what is the nature of the attitude involved in such cases those in which we form beliefs about the real world in response to reading fiction if these attitudes are typically unstable unjustified and unreliable does this put pressure on the view that they are beliefs if these attitudes are beliefs does this put pressure on the view that all beliefs are aimed at truth the final pair of papers in the volume take different stances on the nature of aesthetic testimony and whether testimony of this kind is a legitimate source of beliefs about aesthetic properties and value

essay from the year 2023 in the subject philosophy philosophy of the 17th and 18th centuries grade a utrecht university course analytical metaphysics language english abstract we are born and die in the empirical world we spend our whole lives surrounded by sensible objects and nothing indicates that our mind should be bothered by things beyond the realm of experience if they exist at all however our mind undertakes precisely this kind of challenge i e it tries to reach the unknown and the unreachable this poses a question why would we bother why is our mind interested in issues such as things in themselves or god why are we trying to attach predicates to them and most importantly why do most of us fall into the trap of thinking that we have a legitimate right to do so immanuel kant identified this phenomenon as the transcendental illusion which is a tendency to apply concepts beyond their empirical use even if one is perfectly aware of it 1 just as the stick submerged in water seems to be curved applying concepts beyond experience is equally unavoidable even when one has realised it is an illusion even though kant described in detail the three faculties that later led to empirical cognitions he did not explicitly state how these faculties especially the faculties of intuition and understanding contributed to the rise of transcendental illusion consequently the question this paper aims to answer is how is transcendental illusion possible
